SUMMARY

Software engineer with deep knowledge of TypeScript, React, React Native, Angular, Next.js, NestJS, and ORM. Experienced in both large commercial companies and small freelance projects. Also has experience leading a small team. Possesses a broad range of technologies necessary for the development and deployment of small- to medium-scale applications. I also have experience mentoring several cohorts of RS School students.

EXPERIENCE

Software Engineer

Apr 2022 - Present

Intetics

- Participated in the development of a mobile client for the CRM system.
- Developed several Cordova plugins, including Caller ID, device jailbreak detection, and support for external authentication via a browser.
- Improved the build system, reducing development build time by approximately 10 times.
- Implemented Visual Regression Testing to optimize end-to-end testing using Cypress.
- · Prototyped new functionality using React Native.

Software Developer

Dec 2021 - Apr 2022

EPAM Systems

- Participated in the migration of an internal project from AngularJS to Angular.
- Developed a complex multi-step form with numerous interactive elements.
- Collaborated with 5-member development team using Agile/Scrum methodology

Software Developer

Sep 2020 - Present

Freelance

- · Development of landing pages.
- Integration of websites with CRM systems.
- Integration with Google Maps and Google Docs APIs.

Head of IT Department

Oct 2011 - Dec 2021

JSC «ALEVKURP»

- · Managed a team of up to 4 people.
- EEnsured the uninterrupted operation of the organization's information systems.
- Supported the implementation of electronic document management, ERP systems, IP telephony, and local Jira and GitLab servers.

LANGUAGES

- Russian Native
- English Intermediate
- Polish Basic

PROJECTS

Mobile client for the CRM system

Apr 2022 - Present

- Built mobile client for CRM system with offline capabilities
- · Utilized cordova for cross-platform development

```
TypeScript JavaScript React RTK Query Docker Cordova Handlebars Backbone.js SQLite

Java Swift Objective-C Jest React Testing Library Cypress Storybook Sentry Pendo
```

Telegrmm mini app

Aug 2025 - Nov 2025

- Developed a Telegram-based game for football fans.
- Implemented features allowing players to level up their characters, complete daily quests, and purchase new players.
- Implemented authentication, session management, secure transmission of game statistics to the server, and user activity logging.

```
    Next.js
    React
    Tailwind CSS
    Crypto.js
    PixiJS
    Spine
    Zustand
    Nest.js
    Prisma
    Grammy

    Winston
    Telegram apps SDK
    Jest
    PostgreSQL
    Docker
```

Landing page

Jul 2025 - Aug 2025

- Developed a responsive landing page for an Austrian energy company.
- Developed a feature-rich landing page with a complex multi-step order form.
- Implemented integration with Google Maps API, Gmail API, and CRM systems.

```
Next.js React Tailwind CSS Nodemailer Googleapis Jest Docker
```

Mail dashboard

Jul 2025 - Aug 2025

- Developed an application for scraping email addresses and managing email campaigns.
- Implemented support for two different scrapers, editing address lists, creating email templates, and managing email campaigns with detailed statistics display.
- Implemented authentication with user role assignment, mailing queues, and detailed statistics collection.

```
    Next.js
    React
    Tailwind CSS
    Quill
    Axios
    NestJS
    Mailgun
    Winston
    Mongoose
    MongoDB

    Docker
```

A tool for calculating carbon footprint.

Dec 2021 - Apr 2022

- Developed an application for calculating carbon footprint based on user input.
- Developed a complex multi-step form with state persistence across page reloads.
- Implemented state management using Redux with persistence in localStorage.

```
Angular Redux TypeScript REST API
```

- Developed a cross-platform language learning application based on spaced repetition and gamification mechanics.
- Implemented flashcard-based repetition and a game mechanic inspired by ASCII roguelike games.
- Implemented user authentication and offline-first functionality based on TinyBase.

```
Expo React Native NativeWind React Native reusables TypeScript TinyBase FSRS Zod Zustand Rot.js Clerk
```

EDUCATION

Master's degree in Radio Engineering and Informatics

2002 - 2007

Belarusian State University of Informatics and Radioelectronics (BSUIR)

GPA: 4.6/5.0

Master's thesis: Design of a GSM System for Railway Communication.
